# Factory Automation

Production lines are improved with robot in order to achieve higher productivity, flexibility, and quality.

- Robot Welding Machine for better welding quality.
- Robot Grinding Machine for more perfect appearance.
- Robot Sharpening Machine for better cutting performance.
- Vacuum Heat Treatment for more stable products capability.
- Cryogenic Treatment for better durability.

# Our Quality Control

During the whole processing of raw materials to final products, a series of inspections are taken.

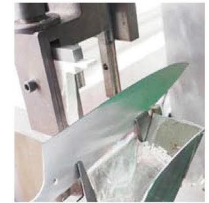

Product materials, functionality, safety and workmanship will be verified by strict requirements .

*SGS qualified*  
*BSCI certificated*  
*FSC verified wood*  
*ISO 9001 Certification*

Hardness Test

Cutting Performance Test
